

Soften the Blow.

Protect staff
and clients with this
innovative, therapeutic
and healthcare
compliant safety tool.

BashBag™

BashBag™ Safe and Easy to Use.

The **BashBag™** is *simple*. It looks and feels like a bean-bag chair — specifically designed to function as a lightweight & durable de-escalation, violence prevention device that serves as a therapeutic barrier between the caregiver and a client that may become assaultive.

BashBag™ A touchless barrier between you and a potentially harmful situation.

Specifically designed for school, home and healthcare environments working with developmentally challenged and children with Autism, **BashBag™** complies with regulations & guidelines required by law providing a unique, touchless solution. *BashBag™ works!*

BashBag™ Features:

- Available in two sizes (LG/Small)
- Available in several colors
- Double-stitched handles
- Double zipper
- Durable & safe

A MESSAGE FROM DOC ELLIOT

CEO Phoenix Training Group

Violence and frustration caregivers experience within the healthcare environment grows every day. Staff require effective tools, resources and training to help keep everyone involved safe.

BashBag™ is an innovative and healthcare compliant product that literally stands between your staff and potentially violent situations, protecting healthcare workers from physical altercations, and keeping the client safer as the incident is de-escalated.
